

GLASPRO™

Single Source Solutions In Glass

Colored Glass

GlasPro colored laminated glass offers a limitless spectrum of super-saturated, light-fast colors which can be fabricated in a wide range of sizes. Select from our assortment of standard colors or create a unique custom color of your own.

Color Toolbox

32 Basic Colors = Endless Combinations

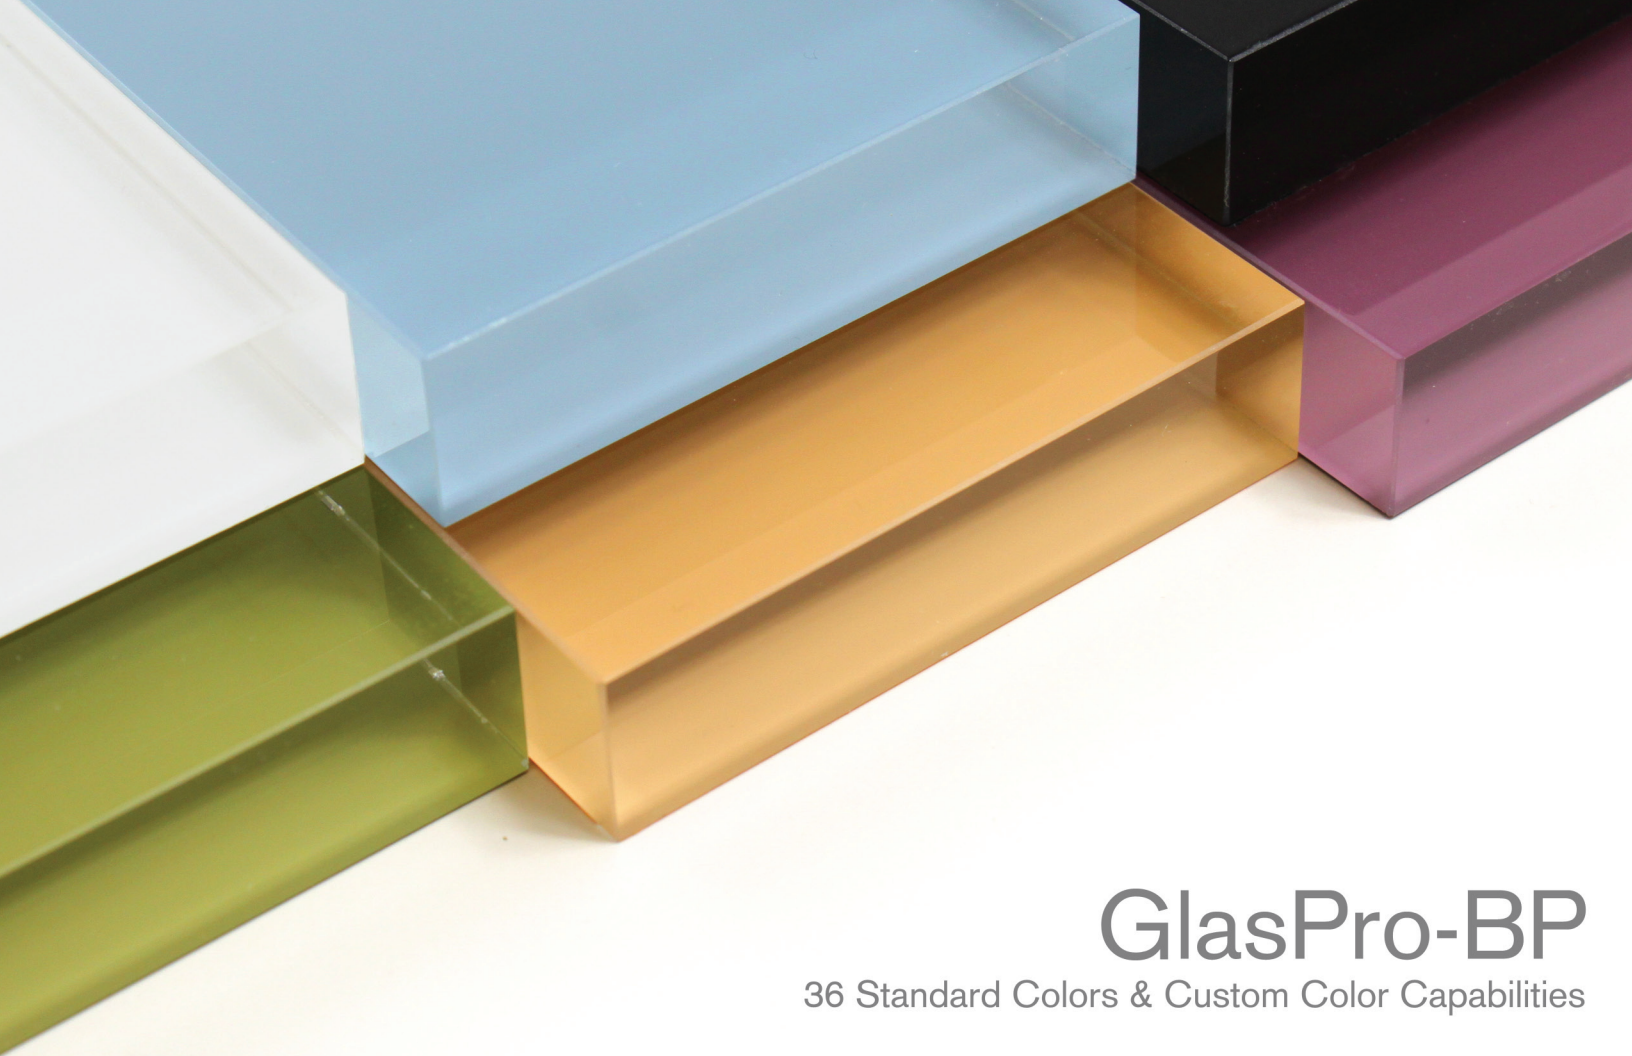

Until now, achieving perfect custom color in glass has never been easy. GlasPro's new Color Toolbox is the breakthrough design tool that puts you in control of creating your own colored glass. The Color Toolbox contains 32 basic colors that can be utilized to create a product that exactly matches your vision.

A photograph of a Louis Vuitton store interior. The store features a large, dark, angular entrance with the brand name 'LOUIS VUITTON' illuminated in white, glowing letters. Inside, there are several display cases. On the left, a series of illuminated shelves display various handbags. In the center, a glass display case contains two mannequins dressed in black outfits. To the right, a large, illuminated display case with a grid of small lights (back-painted glass) contains more handbags and accessories. The floor is highly reflective, showing the store's interior and the glowing lights. The overall atmosphere is modern and sophisticated.
